

	MANUAL INTEGRATED MANAGEMENT SYSTEM	Issue	02
	Section 1 STATEMENT OF MANAGEMENT	Page	1/1
		Date of issue/change	02.01.2020

STATEMENT OF THE MANAGEMENT FOR THE POLICY AND ENERGY MANAGEMENT OBJECTIVES

Our main goal is to create such process management in the company as to ensure efficient use of energy resources.

By taking responsibility for building, maintaining and constantly improving the Energy Management System (EnMS), management has declared its commitment to improving energy performance. A guide declares its policy and ensures that:

- Is suitable for the structure and extent of energy use in the company;
- The policy includes a commitment to continually improve energy performance;
- Providing access to information and resources to meet common and specific energy management objectives;
- The manual ensures compliance with the applicable legal and other requirements that the company implements related to the efficient use of energy;
- Based on policy, general and specific energy targets are also set;
- The management provides supply of energy-efficient products and services as well as design to improve energy performance;
- The energy management system is documented and disseminated;
- The energy management system is regularly reviewed and updated.

Management is committed to the following goals:

- Observing the requirements of the legal norms regarding energy;
- Maintenance and development of the Energy Management System;
- Reducing the risk of over-spending and inefficient use;
- Motivating and training staff in relation to energy management;
- Purchase of new high-tech equipment for metallic processing with high energy efficiency;
- At the same time as achieving higher energy efficiency, the compliance with safety and environmental requirements is met.

The company's management ensures that:

- Has the necessary resources to build, maintain and develop EMS;
- Undertakes to ensure that the introduced Energy Management System is in operation in accordance with the requirements of ISO 50001.
